

GALAXY PROTECTED COMMODITIES PLAN 2
FOUR YEAR TERM, CHOICE OF CAPITAL PROTECTION,
175% OR 225% POTENTIAL UPLIFT

Meteor Asset Management, a leading supplier of investment solutions and retail products, are pleased to announce the launch of a second version, with improved terms, of its highly popular commodities based product called The Galaxy Protected Commodities Plan 2.

As before there are two options available:-

- The Capital Protected Option - offers 100% capital protection and 175% of the increase in the portfolio.
- The Protected Super Growth Option - offers 90% capital protection and 225% of the increase in the portfolio.

Both options have the following features:-

- A four year term.
- Based upon a basket of eight equally split commodities: - Aluminium, Brent Crude, Copper, Lead, Natural Gas, Nickel, WTI Crude Oil and Zinc.
- Minimum investment is £10,000. Maximum is £2,000,000 (larger sums by negotiation).
- Available as a Direct, SIPP and SSAS investment or via a life bond, subject to negotiation.
- Subject to CGT rather than Income Tax.

Graham Devile, Managing Director, commented,

“The first version of Galaxy proved extremely popular with a large number of pension funds as well as individuals, who used the opportunity to diversify their portfolio with the aim of ensuring a positive return regardless of economic and stockmarket conditions. This strategy is supported by market commentators who believe commodities are still in the early stages of a bull run, which in this market have historically run for somewhere in the region of fifteen years.

In addition this latest version of the Plan is subject to CGT providing the majority of tax payers in the UK, who do not take advantage of this allowance, to achieve a tax free return thereby offering an added benefit to the anticipated return.”

The plan is open to individuals, companies, trusts and pension funds as well as most non-UK residents.

The Opening Level for the Plan will be the close of business level on 14th September 2007, whilst the Closing Level will be close of business on 14th September 2011.

Interest will be paid at 4% pa on all investments from receipt of cleared funds to the investment date of 14th September 2007.

Based on Meteor's understanding of current tax regulations, which may be subject to change, gains by UK tax-payers will be paid gross, and may be subject to Capital Gains Tax according to each investor's individual tax position.

IFA commission 3%.

10 July 2007

Background

Meteor Asset Management is a subsidiary of Meteor Capital Holdings both of which were launched in February 2007. The company was established to provide investors, be they individuals or institutions and their advisers with financial solutions. This can be achieved either via its standard range of products or through bespoke arrangements.

Meteor works closely with many leading financial institutions around the world with the objective of bringing investors the most competitive terms available. The company has contacts in Europe, the Middle and Far East which it will be developing in due course.

Notes to Editors:

There is always a counterparty risk on ANY investment. This is the risk that the investment might not pay out the benefits described if one of the financial institutions in which the subscriptions are invested is unable to make repayment under the terms of the bonds. As we choose institutions with highly rated capital security we believe that this is a very small risk, but one of which we make customers aware in our literature.

Meteor Capital Holdings, the Plan Manager, is an approved PEP and ISA Manager. Meteor Asset Management is an Appointed Representative of Meteor Capital Holdings Limited who are authorised and regulated by the Financial Services Authority.

This press release is for professional advisers only and should not be relied upon by private investors. Full details are available within the brochure and terms and conditions which should be studied before any investment is made.
