

METEOR LAUNCHES RAINBOW PLAN

An equally weighted portfolio of six indices

Meteor is launching a new investment plan, based around a range of diverse asset classes, to add to its current range of products.

The Rainbow Plan enables investors to reduce their potential risk in the event of world economic uncertainty, whilst also being able to benefit from favourable economic conditions.

The main points of the plan are:-

- A 5 year and 2 week term
- 100% capital security
- 100% of any growth in the value of the underlying portfolio
- Equal weighting of six indices:-
 - **World Equities** via the MSCI World Index
 - **Property** via the EPRA Index (European Public Real Estate Association)
 - **Government Bonds** via the iBoxx Euro Sovereigns Eurozone Index
 - **Commodities** via the DJAIG Commodities Index
 - **Hedge Funds** via the HFRX Global Hedge Fund Index
 - **UK Equities** via the FTSE 250 Index
- The return is calculated by comparing the average closing levels of the indices over the final twelve months of the plan (thirteen measurement dates) with their opening levels.
- The securities will be issued by a major financial institution with a current credit rating of a least AA- by Standard & Poor's.
- Minimum investment is £10,000

Graham Devile Managing Director, commented,

“It is now widely accepted that, in general, the greater the spread of assets, and in particular non-correlated assets, the higher the returns and the lower the risk. This theory has origins dating back many thousands of years but in more recent times has seen favour through the likes of Markowitz who won a Nobel Prize for his working surrounding the theory.”

In light of this situation we have designed the Rainbow Plan to give investors a broad spread of investments across a number of different asset classes with the aim of providing investors with a Plan that will perform well in favourable market conditions but through its diversity should still perform well in less favourable conditions. It is also simple way in which to create a core portfolio.”

The plan is open for direct investment Trustees, Companies, Pension funds and via Offshore Life Bonds.

The closing date for the plan is 5 October 2007. The Opening Level for the Plan will be the close of business level on 12 October 2007, and the Closing Level will be the average of the close of business levels between 12 October 2011 and 12 October 2012 (13 reads) with the Maturity Date being 26 October 2012.

Interest will be paid at 4% pa on all investments from receipt of cleared funds to the investment date of 12 October 2007.

Investment returns will be paid gross but will be subject to Income tax at the investor's highest marginal rate of tax.

IFA commission 3%.

15 August 2007

Notes to Editors:

There is always a counterparty risk on ANY investment. This is the risk that the investment might not pay out the benefits described if one of the financial institutions in which the subscriptions are invested is unable to make repayment under the terms of the bonds. As we choose institutions with highly rated capital security we believe that this is a very small risk, but one of which we make customers aware in our literature.

Meteor Capital Holdings, the Plan Manager, is an approved PEP and ISA Manager. Meteor Asset Management is an Appointed Representative of Meteor Capital Holdings Limited who are authorised and regulated by the Financial Services Authority.
