

## METEOR LAUNCHES RAINBOW PLAN 2

*A basket of Global Property, Commodities and Emerging Market Equities  
with retrospective allocation to maximise the return*

Meteor is launching a second version of its Rainbow Plan, called Rainbow Plan 2, where the returns are based on three asset classes and weighted, at maturity, according to their performance over the investment term. The plan also offers two levels of capital protection and participation:-

**Option 1 - Capital Protected**      100% capital security with 70% participation in the growth

**Option 2 - Enhanced Growth**      80% capital protection with 100% participation in the growth

The key features are:-

- A five year, two week plan
- Minimum investment is £4,000
- Three asset classes:-
  - **Global Property** - an equally weighted basket of 3 indices - Europe (EPRA), US (IYR US) and Asia (TSEREIT).
  - **Commodities** - an equally weighted basket of four industrial metals – Copper, Aluminium, Lead and Zinc.
  - **Emerging Markets** – an equally weighted basket of four indices – Latin America (ILF US), Russia (RDX EUR), China (HSCEI) and Central Europe (CECEEUR Czech Republic, Hungary and Poland).
- Portfolio weighting: 50% to best performing asset class; 30 % to next best and 20% to the lowest.
- Available either directly, via an ISA, PEP or ISA transfer as well as pension funds, trustees and companies
- The Final Levels will be the average of the closing prices over the last twelve months (13 dates) from 8 February 2012 to 8 February 2013. If the growth is positive the Capital Protected Option will pay 70% of the growth and the Enhanced Option 100% of the growth. In the event that the portfolio has fallen the Capital Protected Option will repay the original investment in full whilst the Enhanced Option will be reduced by 1% for every 1% fall in the value of the portfolio up to a maximum of 20%.
- Subject to Capital Gains Tax.

Graham Devile Managing Director, commented,

*“This plan provides investors with the comfort of either total or partial capital protection at the same time as the opportunity to gain an exposure to those markets which offer potentially substantial returns, but that are extremely volatile.*

*In addition, in these uncertain markets, the diversity and retrospective allocation feature of the portfolio should increase the chances of an absolute return whilst enabling the investor to access the best possible performance that the plan can achieve over the five years.”*

The closing date for the plan is 1 February 2008. The Opening Level for the Plan will be the close of business level on 8 February 2008, Maturity will 22 February 2013.

Interest will be paid at 4% pa on all investments from receipt of cleared funds to the investment date of 8 February 2008.

IFA commission 3%.

**27 November 2007**

**Notes to Editors:**

There is always a counterparty risk on ANY investment. This is the risk that the investment might not pay out the benefits described if one of the financial institutions in which the subscriptions are invested is unable to make repayment under the terms of the bonds. As we choose institutions with highly rated capital security we believe that this is a very small risk, but one of which we make customers aware in our literature.

Meteor Capital Holdings, the Plan Manager, is an approved PEP and ISA Manager. Meteor Asset Management is an Appointed Representative of Meteor Capital Holdings Limited which is authorised and regulated by the Financial Services Authority.

This press release is for professional advisers only and should not be relied upon by private investors. Full details are available within the brochure and terms and conditions which should be studied before any investment is made.
