1. FTSE® Kick Out Plan November 2018

Investment Return

If the Closing Level of the Index on any Measurement Date before the Final Measurement Date is at least equal to its Opening Level the Plan will kick out, i.e. mature early, and make a gross investment return of 10% of the money invested for each year that the Plan has been in force. The first Measurement Date will be on 16 November 2020, two years after the Start Date.

If the Plan has not matured early, and the Closing Level of the Index on the Final Measurement Date (the 'Final Level') is at least equal to its Opening Level, the Plan will provide an investment return at the Maturity Date equal to 70% of the money invested. If the Final Level of the Index is below its Opening Level, no investment return will be payable at the Maturity Date.

Repayment of Capital

An investor will lose money if the Final Level of the Index is below 60% of its Opening Level and the amount of their money that they would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances they could lose all of their money. If the Final Level of the Index is at least equal to 60% of its Opening Level an investor will get back the amount they invested.

Income

If the Closing Level of the Index on any Monthly Measurement Date is at least equal to 75% of its Opening Level, the Plan will pay a gross income of 0.50% for that month. No income will be payable for a month if the Closing Level of the Index is below 75% of its Opening Level on the Monthly Measurement Date.

The first Monthly Measurement Date will be on 19 November 2018, one month after the Start Date. Thereafter, the performance of the Index will be measured monthly. If the kick-out condition is met (see below), income will be paid in respect of that month and the Plan will mature early. No further income payments will then be payable.

Kick-out Condition

From year 2, the Plan will kick-out, i.e. mature early, if the Closing Level of the Index is at least 5% above its Opening Level on any Quarterly Measurement Date. In this event an investor would receive a full return of their money, as well as the income due for that month.

The first Quarterly Measurement Date on which an early maturity could be triggered will be on 19 October 2020, two years after the Start Date.

Repayment of Capital

An investor will lose money if the Final Level of the Index is below 60% of its Opening Level and the amount of money that they would lose will be the percentage by which the Final Level of the Index is below its Opening Level. In extreme circumstances an investor could lose all of their money. If the Final Level of the Index is at least equal to 60% of its Opening Level an investor will get back the amount invested.
