Meteor FTSE Monthly Income Builder Plan

How the Plan Works

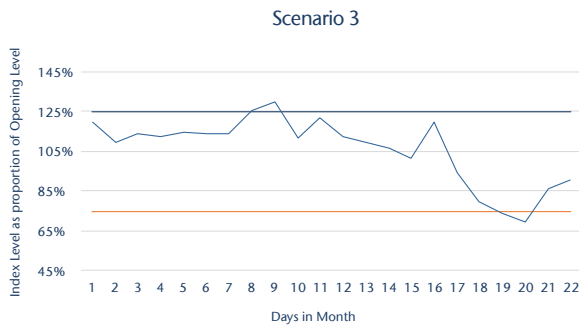

The plan will pay income for every business day during a monthly observation period where the closing level of the FTSE 100 Index (“FTSE”, “the index”) is between 75% and 125% of its opening level. The following example scenarios demonstrate how the performance of the underlying index affects the income paid for an observation period with 22 business days.

The FTSE remains below 125% and above 75% of its starting level every day. 22 divided by 22 multiplied by 0.5% equals 0.5% income during the month.

The FTSE falls below 75% of its starting level at some point. 12 days were out of the range so 10 divided by 22 multiplied by 0.5% equals 0.23% income during the month.

The FTSE rises above 125% of its starting level and drops below 75%. For 4 days the FTSE was out of range - 2 days over 125% and 2 days below 75%. 18 divided by 22 multiplied by 0.5% equals 0.41% income during the month.

The FTSE starts below 75% of its starting level and never rises above this during the entire month. 0 divided by 22 multiplied by 0.5% equals 0% income during the month.

Historical Simulation

- Observation Period: 30/12/1983 to 05/08/2016
- Number of 6 year cycles tested: 6738
- Capital lost on zero simulations
- Average simulated return: 19.76%
- Best simulated return: 35.72%
- Worst simulated return: 1.42%

Total Income Achieved	Percentage of Cycles
0-10%	21.79%
10-20%	36.44%
20-30%	22.94%
30-36%	18.83%

Past performance is not a reliable indicator of future performance and should not be used to assess the future returns or risks associated with this plan.
