

# FTSE 100 Autocalls Index

## April 2019 Analysis

The FTSE 100 Autocalls Indices are Meteor’s own indices based on our FTSE-only plans. The ‘at-the-money’ consists of plans with an at-the-money call level throughout, ‘defensive’ contains plans where the call levels get progressively lower, and ‘all’ has any Meteor FTSE-only autocall.

**FTSE Autocalls vs FTSE 100 Total Return Index**

On the last day of 2018, the FTSE 100 index closed at 6,728.13. Four months later, it is now in the mid-7000s, gaining a little over 10% in 2019. In comparison, the at-the-money index has gained almost 16%. To us, that’s pretty impressive. It goes to show that our plans are working as designed.

Over the past four months, we’ve seen a steady rise in global indices, which has, in turn, helped our indices improve also. It’s great to see that in bullish markets, our plans are able to keep up, or even outperform, the underlyings that they are linked to. We’ve seen a similar performance during bearish periods too, where the indices have fallen almost in sync with the underlyings. The one key benefit of our plans, though, is the capital protection barrier, which protects our client’s investments against falls of typically 40%.

April also saw 11 Meteor plans mature, and we hope that May will continue the trend of our client’s getting great returns from our offerings.

	At-the-money	Defensive	All	TR Index
<b>Last Price (30/04/2019)</b>	129.91%	128.40%	130.03%	133.26%
